**WHY BURY YOUR HEAD
IN THE SAND WHEN
YOU CAN GET A
LIFE FILTER FITTED INSTEAD?**

and now the science...

HOW IT WORKS

This simple device allows one to bury one's head in the sand whilst also remaining in an upright position.

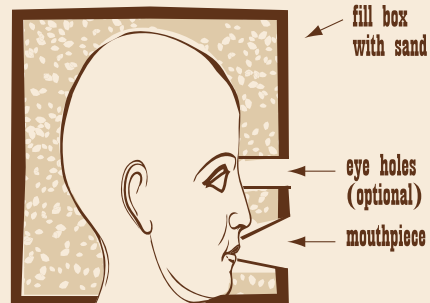

The advantages are thus:

One is able to see only what one chooses to see through the eye-holes.

One is barely able to hear the lewd language employed by those who shout AT one due to the lack of ear holes.

At the same time, the mouthpiece is fashioned into a megaphone ensuring that one's points are made clearly and loudly.

Fashioned from finest mahogany: the gentleman's choice!

*important note: no earholes
